# PUREGRO

Our Puregro is an excellent soil amendment designed for use in various landscaping and edible garden applications. It is rich in organic matter to improve soil structure and water holding capacity

## Typical Analysis

Moisture Content - 32% to 42%

pH - 7.5 to 8.5 | C:N - 10 to 12

Screen Size - 3/8" minus

## Benefits

Breaks up compacted soil for healthy plant root growth.

Holds up to 3x its weight in water, preventing drought in sandy soils.

Increases organic matter in soil, important for healthy soil ecology and plant health.

## Uses and Recommended Application Rates

<b>Lawns</b>	Incorporate up to 1 inch of compost into the top 6 to 12 inches of soil before planting new lawns
	Top dress with 1/4 inch per year to maintain a healthy lawn. Core aerate first, if possibly
<b>Gardens</b>	Incorporate up to 3 inches into soil for new gardens or to rejuvenate old flower and edible gardens
	Top dress with 1 inch per year to maintain a healthy and productive garden
<b>Trees &amp; Shrubs</b>	Dig hole twice as wide as the root ball, plant, and refill with equal parts soil and compost
	Top dress area under tree with 1 inch per year to maintain health

For best results, apply only as directed.

Ingredients: Compost (Compost made from forest products and poultry by-products

Product may be dusty, wear appropriate personal protective equipment when applying. Store in a dry location.

Puregro is available in bulk by the cubic yard
